Drugs and Terrorism

I want to commend Dr. David Gibson on his very excellent article on "Terrorism's Next Target?" From all I have read and seen on bioterrorism, I have never heard or thought much about counterfeiting pharmaceuticals; yet I certainly remember the Tylenol episode. It was the basis for our current packaging with seals.

Sincerest thanks to Dr. Gibson and to SSVMS for publishing this information.
— Cleve Baker, MD

[Dr. Gibson's article was also picked up and published in the Sacramento Business Journal.
